

## JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove set out on a cross country RV voyage. After spending numerous years establishing his family built crane business with his brother, John had no idea that this trip would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road trip.

All through their trip, John reacquainted himself with previous business connections along the way. In combination with these conversations and a noteworthy event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a vast market for a product that could quickly and safely elevate individuals in the air to accomplish maintenance and other construction services.

After returning from their trip, John set up a joint venture with two of his friends and purchased a metal fabrication business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty staff, they produced and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design elements of that original lift into current versions.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fateful cross-country journey and since the first JLG aerial platform entered the market. As of today, the business has expanded itself into many different global markets and continues to cultivate contemporary machines to guarantee that clients are able to become safer and more well-organized within their workplace.
