

## Rotators for Forklift

Forklift Rotator - Forklift attachments are available for many applications. For example, the forklift rotator is helpful for lifting, rotating and moving barrels and drums. There are various accessories useful for carrying cartons and carpet rolls, for dumping waste materials or sand. Some of the most regularly used forklift accessories are the side shifter attachments, fork positioner, rotator and clamp. These tools come in various sizes to fit various forklift units. They are meant to hold really heavy things and are an advantage to numerous warehouse and factory environments.
