

Drum Clamps

Drum Clamp - Forklifts are utilized to deal with storing, lifting and moving pallets. For businesses that handle products inside drums, you have to use an attachment so as to move, lift and store them. There are various drum forklift accessories which you could get for all of your drum moving, lifting and storing needs. These attachments are specially meant so as to handle drum containers - thus there is no risk of damage to the product or drum container whenever they are stored, moved or lifted.

Drum Positioner And Grab

The drum positioner can be utilized in order to load and unload drums off of racks, drum stands and vehicles. These are obtainable in three or four tine models. This accessory is fully mechanical, therefore enabling the person operating it to operate all from the comfort of the lift truck seat. Able to move large and extra large plastic drums, steel, its capacity is 210 liters. This attachment is meant for drum pyramid stacking.

The drum grab is fork designed and mounted with the sole purpose of dealing with steel drums which have rolling hoops. Even though the purpose for the design was to deal with steel drums with rolling hoops, the drum grab could accommodate the transporting of large and extra large plastic drums. Drum capacity maximum is 220 liters for plastic barrels and 210 for steel drums with rolling hoops.

The Rotator

The drum rotator is one more forklift accessory that mounts onto the blades themselves. Their purpose is to pick up the drum and rotate it upside down. The drum is clasped into the drum rotator with a clamp which fits around the center of the drum. The rotation is done by either a crank handle or a continuous loop chain. The crank handle is intended for operations which occur beneath shoulder level. For operations that must occur over shoulder level, the continual loop chain will be utilized.

Drum tines are straightforward fork mounted attachment which can be meant for stacking and unstacking 210-liter steel drums. Stacking involves nothing fancy, just simple horizontal placement of the drums. The carriage-mounted attachments lessen the load center of the drums.

Automatic Tongs

Drum tongs are accessible in automatic and semi-automatic versions. They are for use in the tight head or open topped steel drum kinds. The drum tongs can be attached in several ways to the forklift. One method is to connect them underneath a fork-mounted hook. Another way is to connect them to a fork-mounted jib or a carriage mounted jib. Either the automatic and semi-automatic have a drum capacity of 210 liters. With the automatic, there is no need for the operator to ever leave the seat of the lift truck.

Rim Grip Handler

When drums need storage with inadequate spacing obtainable, the Rim Grip Drum Handler is the best alternative in drum forklift attachments. This accessory would work for both the two hundred ten liter drums along with one hundred twenty liter drums. The Rim Grip Handler works by utilizing steel jaws so as to hold the edge of the drum. It picks the drum up and sets it down without requiring any room between all the drums. The average model in the business is a zinc-plated handler, even if, this particular accessory is available in stainless steel for the food and drink market.
